Occasionally, an instructor may have the need to limit which students can see certain course content or reopen a RamCT test to allow certain students to take the test. You can use the RamCT Adaptive Release tool to provide access to specific students so they can take and submit a test.

I. Set Adaptive Release Membership Criteria on a Test ................................................................. 1
II. Edit Test Options: Add Test Date Criteria................................................................................. 3
III. RamCT Support.......................................................................................................................... 4

I. SET ADAPTIVE RELEASE MEMBERSHIP CRITERIA ON A TEST

a. Next to a test you have deployed in your course, click the drop down menu next to the test’s name and select Adaptive Release.

b. Date – we recommend that you not set Test date criteria with Adaptive Release.

Instead, use the date criteria under Edit Test Options in step II to set Display After and Display Until dates. This prevents conflicts between dates set on the test and dates that are set under Adaptive Release.

If you are setting adaptive release on something other than a test, then it would be ok to set date criteria.
Membership - You can browse and select the members (students) in the class who you would like to be able to view the test.

c. Under Membership click Browse.

d. Click GO to see all of the students in the course.

e. Place a check next to the student(s) you would like to have access to this item/test.

f. Click Submit.
In the **Username** box you will see the name(s) of the students who will have access to this item.

2. **Membership**

   This content item is visible to all users until a Membership criterion is created.

<table>
<thead>
<tr>
<th>Username</th>
<th>Browse...</th>
</tr>
</thead>
<tbody>
<tr>
<td><a href="mailto:kevin@udmont.edu">kevin@udmont.edu</a></td>
<td></td>
</tr>
</tbody>
</table>

   Enter one or more Username values or click **Browse**.

   **g. Click Submit**

   Under the test’s name you will now see: **Enabled: Adaptive Release**.
   - We have used the Membership criteria to control who can see this test.

   This lets the instructor know that Adaptive Release criteria has been applied to this test.

   ![Test Example](image)
   **Enabled: Adaptive Release**

**II. EDIT TEST OPTIONS: ADD TEST DATE CRITERIA**

a. Next to the **name of the deployed test**, click on the **drop down menu** and select **Edit the Test Options**.

   ![Test Example](image)
   **Enabled: Adaptive Release**

b. Under **Test Availability** scroll down to the **date section**.

   ![Test Availability](image)

   **2. Test Availability**
c. **Display After:** The test would not be visible to anyone until the Display After date/time occurs.

If you set a Due Date, the Due Date will not appear on the To Do module on the course dashboard until the Display After date occurs.

d. **Display Until:** When this date/time occurs, the link to the test will disappear to all users.

e. **Click Submit**

We have used the Adaptive Release Member criteria to control who can see the Test.

We have used the Test Options date criteria to control when the test can be viewed/accessed.

### III. RAMCT SUPPORT

Support for RamCT is available from a number of sources:

RamCT help website:
