

RamCT course technology Using Safari 4 and SafeAssign

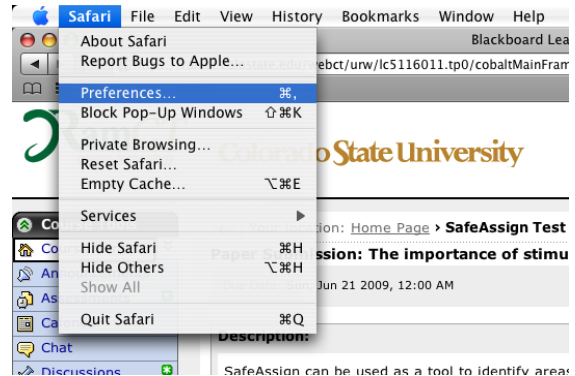

In the summer of 2009 Apple released version 4 of their web browser, Safari.

Users of Safari 4 receive the following error when they try to use SafeAssign in RamCT:

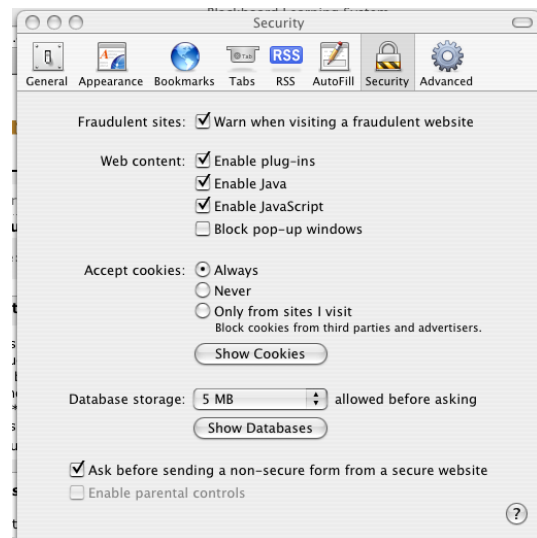

Sorry, we do not think you are logged in to SafeAssign. Your session may have timed out. If you have received this message in error, please contact your system administrator.

You need to change a setting on Safari 4 to allow it to work well with SafeAssign:

1. Under the **Safari** menu *select Preferences*.

2. At the top of the window *click on the Security icon*.
3. Under the **Accept Cookies** section *click on Always*.
4. *Close the Preferences window*.
5. *Close Safari*.
6. *Open Safari and log back in to RamCT*.

You should now be able to use SafeAssign.
